

Impffolgen: German vaccine damage from official sources

by Anton (@infopinie) | Dec 17 2022, 12:12 pm

we can now really speak of vaccination damage and vaccination deaths. The circumstantial evidence is now piled up sky high, only the corpus delicti is still missing: the data manipulation, data concealment, misrepresentation, whatever you want to call it. Our governments have that data in their hands. Only those can provide hard evidence that the vaccinations have nothing to do with tens of thousands of unnecessary deaths in the Netherlands.

I will spare you the German names, institutes and protocols. Protagonists are in any case

- **Paul Ehrlich Institute**

The Paul Ehrlich Institute is a German federal agency, medical regulatory body and research institute for vaccines and biomedicines.

- **Robert Koch Institute**

The Robert Koch Institute is a German federal government agency and research institute responsible for disease control and prevention.

- **Kassenärztlichen Vereinigungen (KV-en)**

Health insurers

- **AfD**

Political party: Alternative für Deutschland.

The German [AfD presents data here](#) from a kind of WOB request, which is still well honored in Germany. The AfD is considered by many to be [\(extreme\) right](#). what is it that only the extreme right wants to get the facts out... Or will anyone who wants to see the facts be portrayed as extreme right-wing?

In any case, the data request provided a [PDF](#) with 90 pages as below. (At the bottom of this article you will also find links to Excel files). It immediately indicates how outdated our laws are, there should have been a legally prescribed data format for that a long time ago, at least an open importable standard as is often behind download buttons (CSV, XLS, JSON for example). There is no bombshell data behind those download buttons.

Data analyst Tom Lausen (see also [previous article](#)) went to work with it and filtered on the codes mentioned by the Paul Ehrlich Institute as important signal values to keep

Converting a PDF back to tables is often painstaking and error-prone; you can only visually randomly check whether the numbers have ended up correctly in the right record and the right cell. They look like original generated PDFs in Germany. In the Netherlands, they first print them out and then scan them again (crooked and at low resolution) and then e-mail them. For example, the loss of quality of a fax is simulated. It is then even more difficult to turn it into analyseable data.

Signals of Special Interest

- **R96.0** Sudden death
- **R96.1.** Onset of death within 24 hours of onset of symptoms, with no other cause
- **R98.** Death without the presence of others
- **R99.** Other uncertain or unspecified causes of death

These codes do not require any further explanation. And of course Maarten: even without vaccination, people can die in this way. But that can't explain the graph below.

graph above.

In the earlier article with Tom Lausen, the legal obligations to which the German Institutes have to comply were also mentioned. They don't, through all kinds of delaying tactics. In the Netherlands we have no such laws. We have never before experienced first-hand what a Nazi-like collective can achieve in our own country. In good faith we start from promises and intentions. We still rely on parliament and the nonsensical, incompetent designs of debates, despite the fact that WOB requests are ignored, data is hidden, promises are broken, laws are broken, communication erased and/or painted away, the big magazines are currently the flyerers of state propaganda and the broadcasters serve as soapbox where anyone can stand on who wants to support the state narrative with meaning or nonsense.

It even goes so far that Beau was ridiculed last night elon Musk. That's dust for another blog but I wonder at all those shows how on earth they find those guys together? So united, so in the same tunnel vision... that must become increasingly difficult. After all, the group of good noses in the corona story is getting smaller and smaller. Whoever changes camps leaves the state narrative; never does anyone walk the other way with motivations like: "Oh my gosh – the lockdowns actually seem to have helped and the vaccines have been a godsend after all, a miracle of technology! And contamination just goes through droplets, so masks do work! And hand pumps too. Sorry I didn't want to take that all this time."

Does anyone know of a proven doubter who now supports government policy? Let us know in the comments.

Graphs and tables

These are also based on data from the Kassenärztliche Bundesvereinigung – KBV Publication of 29.11.2022 / Diagnosis data of approximately 72 million legally insured Germans.

fällen*)	5 – 11 Jahre	12 – 17 Jahre	18 – 59 Jahre	Älter als 60 Jahre
1 Tag	0	0	85	255
2 Tagen (aufsummiert)	0	3	129	294
3 Tagen (aufsummiert)	0	5	144	361
7 Tagen (aufsummiert)	0	5	165	557
14 Tagen (aufsummiert)	0	6	201	723
30 Tagen (aufsummiert)	0	7	214	875
42 Tagen (Gesamtsumme 1-42 Tage)	0	7	224	903

It would be interesting, for example in the case of 12-17 year olds, to compare the numbers with the chance that five teenagers die within 3 days of the jab.

Reports of death. How do we look at this? It seems that the longer the jab has been suffered, the fewer people link a sudden death to the jab. After 42 days I can imagine something. But not within three days.

For example, look at 18-59 years. Between 30 days, about 2.1 deaths per day have been reported.

Day 1 after vaccination: 85 reported! On day two: only 44. On day three, only 15 more will be added. A sudden death within three days is just as suspicious for relatives as after two days, or even within 1 day. The drop from 85 to 15 is not because people have forgotten that someone has recently been vaccinated.

R96.0: Sudden death

Death within 24 hours of the onset of symptoms, without other Indication

R98: Death without the presence of other persons

R99: Other vague or unspecified causes of death

The first quarter of 2022 does not look hopeful

R96.0 Sudden death quarter 1, 2022

R96.1 Less than 24 hours after the onset of symptoms, not otherwise specified

R98.0: Death without presence from other persons

R99.0: Sonstige ungenau oder nicht näher bezeichnete Todesursachen

I46.1: Sudden cardiac death, as described
Described

Gegevensbron: Gegevens van de Kassenärztliche Bundesvereinigung - KBV Publicatie van 29.11.2022 / Diagnosegegevens van ca. 72 miljoen wettelijk verzekerde Duitsers.

Total overview incl. 1st quarter 2022

Additional

<https://verifieddata.substack.com/p/analysis-of-the-recently-published>

The course of myocarditis and pericarditis, compared quarterly over the last seven years.

Percentage increase in various complaints and disorders first quarter 2022 vs first quarter 2019.

- Stroke up 6%
- Headaches: up 25%
- Acute respiratory infections: up 60%
- Lung cancer: 93% up

Pericarditis	25%	1,103
Sudden death	461.5%	35,242
Headaches and migraines	24.7%	1,220,893
Pain in throat	106.1%	326,747
Acute upper respiratory infection, unspecified	60.7%	5,294,339
Lung cancer	93.2%	83,234
Heart attack	1.8%	-107,360
Stroke	6.1%	-159,341

Germany is not the Netherlands...

That's right, in the Netherlands similar research is not allowed, the data are state secrets. No doubt it is also a drama here. How long will government agencies and media succeed in hiding this from view in the Netherlands?

It is understandable that Elon Musk's transparency initiative is being convulsively sabotaged by the media, health initiatives, governments and the EU. After all, when the truth comes to light, state security comes into question, hence the blackening.

Unfortunately, shaking up the state order is entirely justified. The State should be there for the citizen and that time is clearly over. Health care ditto and the media that should be controlling have been pushed into alternative corners.

It is an incompetent clump of power that needs to be thoroughly revised. And then 'incompetent' is the most gentle qualification I can think of. And vaccination is still encouraged for everyone from the age of 12...

Epilogue

The PDF does not make it easy to check the data. Critical reviews are now also available. The data also remains intact in the fact checks.

If you want to check the source yourself: in this [discussion of amidwesterndoctor](#) there are links to Excel data.

presentation. Tom Lausen is certainly not a cookie cutter.

I notice that you are getting more and more indignant, Anton. I recognize it.

But fear you're right. This is also probably not going to make it in the MSM. Now it's AfD again, and that will be the main argument of the debunkers. Do not respond to the content (because it cannot be refuted), but play the man. You see the same thing happening with Maurice. It is burned down on completely different files.

It's great that you bring this kind of thing to the surface. Hope it goes viral one day.

Within my family in 2nd 3rd and 4th line and in-laws near and further away, most are fully vaccinated. Of this relatively small

added. The latter already had health problems, but these complaints are completely new. We ourselves are not vaccinated, but we are confronted with great long-term tensions and insomnia. At our age not conducive to health, but covid complaints we do not know, have never done visitation restrictions, but do take vitamin C and D supplements. We also belong to the so-called risk groups because of age and I have been given a stent because of heart problems in the past.

We won't fit into the official statistics, I think

Thanks, I had seen it too, added a postscript half an hour ago!

Michael Sirk on 17/12/2022 at 17:02

Good article!

However, I am afraid that they will never admit that the vaccine is the cause. Look at the reaction of the MSM in Germany. Instead of objectively having the discussion, they immediately (within 1 day) go on the counter attack.

Sylvain Ephimenco, a long-time columnist at newspaper Trouw, is a critical observer of government policy on Corona, somewhere in mid-2021 completely turned into a slavish follower of the government irritant. There is no turning back for him either, because the Spike proteins with the LNPs are in that unwieldy body and you will never get them out again!
