

COVID-19 Contracts

United States of America

Below are links to copies of the contracts entered into by the US government for technologies to combat the COVID-19 pandemic. KEI is updating this page as we gain access to more contracts, and less redacted versions.

Agreements related to the Medical CBRN Defense Consortium (MCDC) whose agreements are executed by Advanced Technology International (ATI) are noted with "*via ATI*".

KEI has also created a [US COVID-19 contract spreadsheet](#) to track metadata of the agreements, as well as to compare the terms contained therein for intellectual property rights, data, and other topics. (Note: At this time, this spreadsheet is being continually updated.)

KEI maintains a separate page of US government [contracts concerning needle and syringe production related to the COVID-19 response](#).

The list below contains COVID-19-related contracts obtained via Freedom of Information Act requests, Securities & Exchange Commission filings, and HHS reading room files. The bulk of KEI's database of contracts, however, was obtained via FOIA requests and lawsuits filed by KEI. ***Linked herein is a comprehensive***
